B. J. Kumaraswamy Naik Esquire B.A.,

Deputy Commissioner, Bangalore District.

To

K. S. Chendrasekhara Aiyar Esquire B.A.,B.L.,

Secy.to the Govt.of H.H.the Maharaja of Mysore,

General and Revenue Departments.

Sir,

I have the honor to forward herewith, in original, the memo dated 16th October 1908, from the Superintendent of Police giving cover to the Bangalore Taluk Amildar's Report of the same date regarding an accident in which a boy was wounded by a gun shot during the firing at the Hebbal Range on the 15th idem and to state as follows:-

1. It would appear that during the Tactical Firing Practice on the morning of the 15th Instant by the marginally noted units at the Hebbal Range, a Vokkaliga boy named Nanja about 18 years old, who was lifting water by means of a piccota from a well in his garden in the Bhupasandra village was wounded by a bullet which came from the side of the Butts and hit him under the right arm pit and pierced, through the back, out near the left arm pit. The boy having dropped down into the well which contained water only a knee deep is stated to have been taken out of it by his father and cousin who were also working in the garden at the time and removed to the Bowring Civil Hospital where he is now under treatment. Slender hopes are entertained of the boy's recovery from the effects of the injury.

(1) 81st Madras Native Infantry (Pioneers)
(2) Royal Engineers and Sappers (Second Queen's own Sappers and Miners.)
(3) Sherwood Foresters.

2. From the Amildar's Report and the sketch accompanying the same, it will be seen that the Ranges marked A, B and C are lower than the other portion and, consequently, less safe for Tactical Firing, the area between that portion of the Range and the Hebbal Tank being exposed to danger. In view of the reported fact that the garden where the injured boy was working is stated to be outside the area marked

as

From

The District Superintendent

of Police

Bangalore

Dated 16.10.08

Sir,

I beg to submit the following report in connection with a fire accident that occurred on the Hebbal Range yesterday morning at about 8.30 A.M.

A telephone communication was received yesterday afternoon from the Daffedar of Hebbal Station that as ascertained

Submitted to the Deputy Commissioner Bangalore District.

The accident is very much regretted.

The Hebbal Range is bounded on all sides by villages and is open to the public. When Ranges are used for Tactical Firing, as they are lower than the surrounding hills, the Villagers including the Grazing cattle are exposed to danger. Hence the Hebbal Range is closed for the purpose. Markers at Boards are posted at the entrances of the Range and are engaged not only for that purpose but also to prevent the villagers including the cattle from straying into the Range.

stating that a youth was wounded by a gun shot and that he was being conveyed to the Bowring Hospital. I immediately went to the Hospital and found the Youth who is aged about 18 years in a sleep. After a little while I awoke him up and recorded his statement which goes to show that he is a Vakkaliga of Nagasetti halli village and was engaged in lifting water for the chilly plants in his garden from a well by means of a Picota at about 8.30 a.m. yesterday near Bimpasandra Village, and that father and one Buttu were also present there and that while in the act of stooping to lift the picota he was wounded in his right side and that simultaneously he felt a pain on the left side, and that in the facts have as elicited by the Bilder enquiry - The injured is not altogether out of danger although hopes might be expressed of his recovery the effect of the injury -

I express my full concurrence with the conclusion arrived at by the Bilder & strongly urge the adoption of such measures as effectually guard the line of fire so as to prevent accidents of the sort in future

H Krishnamachar
D.S.P.
16.6.08

Addl: The 4 pieces of bullets picked near the field where the accident occurred are herewith sent for inspection

Illegible

in Consequence he dropped into the well, and was immediately taken out by the father and the said Putta and Conveyed to the Hospital. The father Rama and Putta Corroborated the Youth, and State that while they and others were Conveying the wounded Youth to the Hospital, they were met near the Butts by a Military Officer who had the wounds attended to, by the Military Hospital assistant and after that, sent the Youth to the Bowring civil Hospital.

The Hospital Assistant who was on duty in the Bowring Hospital, at the time of my visit told me, that the wound was Serious and that the bullet has passed through the body, just under both arm pits more towards the back, and the case may prove fatal.

I went to the Butts this morning and met Lieutenant Forbes of the B.R. Volunteers who told me that he saw the Youth yesterday, and that he was of opinion that it was a bullet from one of the Ranges; probably the Range occupied by Tactical firing that had caused the wound.

From enquiries further instituted at the Range and the statements of the marginally noted persons there can be no doubt whatever that the wound is caused by a bullet from the Ranges.

1 Rama
2 Putha
3 Sd. Davood
4 Sd. Mansha
Patel.

It was elicited from enquiries that there was both "Bulls Eye" and "Tactical" firing yesterday; and as the Bulls Eye firing is conducted with more time and leisure; greater precision of hitting the required mark is obtained. So that, it is impossible that the bullet could have been from any of the Ranges

Ranges occupied by this kind of shooting.

The opinion therefore decrees itself to the probability, that, the bullets must have been from one of the Ranges of the Tactical firing, which is done under a limited Space of time during which the men firing have to be very quick in their movements in handling their guns, to send off the required number of shots and consequently liable to be out of precision.

The marginally noted units are reported to have been engaged in Tactical firing and the distances are maximum 600 yds and minimum 200 yds.

1. 81st R.A.I.
2. Royal Engineers & Sappers.
3 Sherwood Foresters.

The Ranges taken up for Tactical firing were the Ranges marked A, B & C which are unfortunately comparatively lower than the other parts of the Range and less effective as a shot Butts and

(Sketch enclosed)

consequently less safe for Tactical firing.

As so many Units were engaged in the same kind of shooting, it is rather difficult to bring the accident home to any unit in particular. But my observations in connection with this accident will show that there is a great necessity to raise the Range on this post of the Shot Butts as also to better protect it, by planting a thicker belt of trees in this vicinity, as it is quite certain that the bullet must have flown over the mark, rather than "Ricochet" Judging from the nature of the wound and the distance the Youth was struck at.

The spot where the Youth was wounded is a vegetable garden near the Boopsandra village, and

and situated to the west of the Experi-
mental Farm.

The spot is out of the line
defined as dangerous in connection
with the firing, so that it shows a clear
and absolute necessity for increasing
and guarding the line of fire, and my
enquiries in the neighbouring villages
in this connection: also to show
that at times bullets fall into
the water spread of the Hebbal Tank;
and the Inspector who went to the
spot this morning has produced
four bullets which he found
in the vicinity of the well.

The youth is still reported to
be lingering and the faintest hopes
are entertained of his recovery.

In conclusion, I beg to add
that at present the line of fire
is defectively guarded, which is done
by posting up a few red flags

which after a little while, lose their importance and significance, to the callous eyes; who is often seen crossing the most dangerous part of the area in sublime indifference. I would therefore beg to suggest that the area to be protected, should not only be enlarged but should positively be picketted by military men on all occasions there is firing carried on at the ranges; owing to the paucity of the Police allocation of this Taluk -

I sketch of the scene of the accident together with statements and the four bullets are herewith submitted -

I beg to remain
Sir
Your most obedt servant

Sir

Signed by
for H. S. Lehanbrachchan
Asst

I am directed to state that the Dy. Commr of the Bangalore district reports that while the marginally noted Units were practising Tactical Firing at the Hebbal Range on the morning of the 15th Octr last, a Vok Kaliga boy named Naija who was lifting water from a well in his garden in the Bhupasandra village was wounded by a bullet which appeared to proceed from the range. The shot hit him

over.

SUBJECT.

under the right arm pit, passed through his body and emerged near the left arm pit. The boy dropped down into the well, which however contained water only Knee-deep, and was taken out and removed to the Bowring Civil Hospital for treatment by his father and another person who were working in the garden at the time of the accident.

It is also stated ~~that~~ four other bullets were found ~~on the 16 Oct~~ by the Police Inspector ~~who went to the spot~~ on the 16th Oct near the well where the boy was wounded.

2) From enquiries made by the Amildar of the Bangalore Taluk on the afternoon of the 15th idem and from the statements of the father of the wounded boy, the Patel of the Bhupasandra village and two others, it is concluded that the bullet must have proceeded from the ranges occupied by the above-mentioned

GENERAL AND REVENUE SECRETARIAT.

(*Continuation Sheet draft form.*)

It is reported ~~that~~ that ~~The Durbar understand~~ that the garden where the boy was working is outside the danger zone marked as such and closed to the public. It is however understood that the Stop butts on the ranges used for Tactical Firing on the 15th Oct^r ~~1908~~ are comparatively lower and less effective than on the other parts of the Range.

3) In bringing the above facts to the notice of the Honble the Resident, I am to request that the Military Authorities may kindly be moved to make arrangements for decreasing the width of the range by excluding from the firing area the portions shown as A, B and C in the Sketch sent herewith or, if that is not practicable to increase the height of the Stop butts particularly at the portions A, B & C

so as to render them more effective as Stop butts and less dangerous to the ryots working in the neighbouring gardens.

I have &c.
